

Medway Education Business Partnership Medway Mentoring Evaluation Mentor and Mentee Self Assessment and Comments

The following charts and comments are taken from the raw data from the mentees' and teachers' questionnaires from the end of the year. They illustrate the changes that are considered, by the young people and their teachers, to have taken place at least partly as a consequence of involvement in the mentoring programme.

The following questionnaires were completed with teachers prior to commencement and again at the end of the year:

0 = totally lacking 1 = hardly any 2 = a little 3 = not too bad 4 = quite good 5 = excellent

Teachers' Comments at End of Year

Excellent programme for *****. She has really changed - come out of her shell.

Fantastic - total change in ***** attitude to me and at school - really coming out of his shell.

Completed by form tutor. Very successful. ***** really benefitted.

Mentor left and student did not wish to continue.

Completed by form tutor. Mentor left and student did not wish to continue.

Completed by form tutor. Being a prefect has very much helped *****'s confidence. ***** is very committed to her school work, constantly searching for ways to gain extra marks. I think this service has really helped *****'s confidence.

Completed by form tutor. ***** has found her sessions useful and takes her books along for assistance, particularly science and maths. Mentor also takes books to sessions on occasions.

*****'s confidence and general attitude improved over year.

***** is a very needy student and benefits greatly from regular support.

***** has gained greatly from being mentored. She is much happier and a positive member of the form.

Successful relationship slow and steady but student has benefited being able to talk things through.

***** has become more co-operative towards others, especially staff. She has changed in her attitude to her own capabilities and learning.

Fantastic and positive contribution to form now

***** has made a little progress through the year. We would like her to continue mentoring next year.

In my view ***** has much better confidence and esteem which has led to improved communication skills and commitment to his progress

***** really enjoyed the mentoring programme. He gained in confidence and was more able to deal with home issues, remaining calm and rational.
